

Low fi Prototype

Tayttum Horine

Statement

- These are the drawings from Excalidraw of my prototype app.

Creating an account

Register

Name

Tayttun

Email

tayttun@mail.com

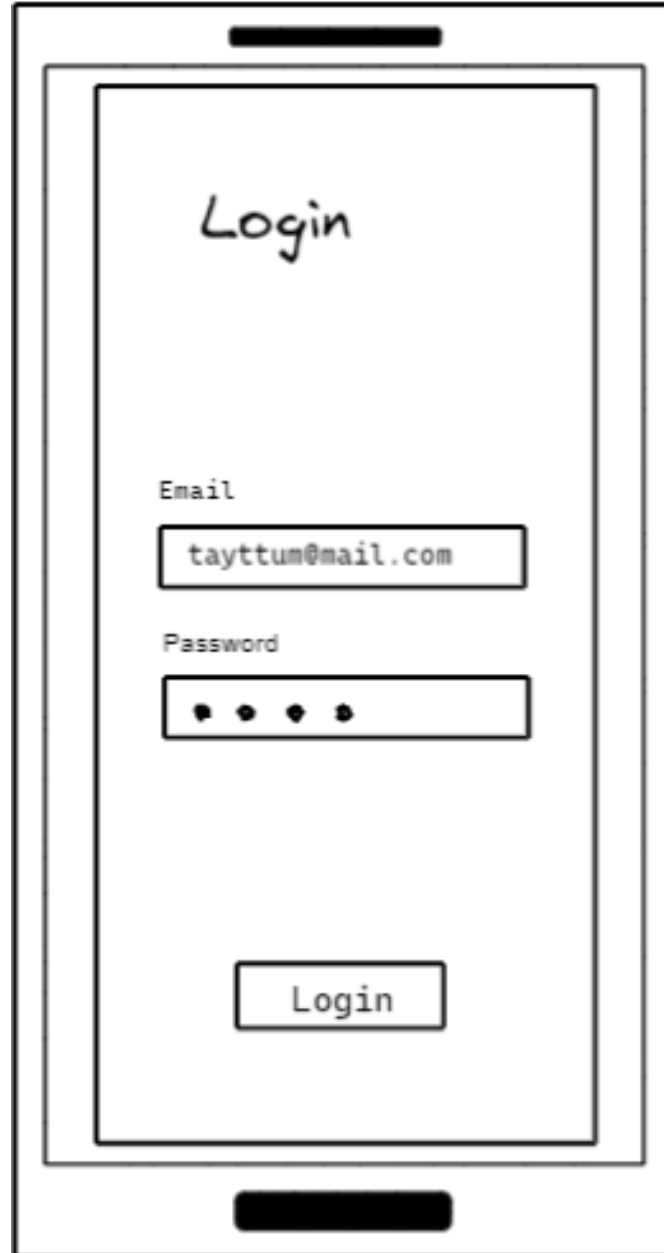

Password

Confirm Password

Create

- User creates an account and clicks create, then will move to the login screen.
- If the user has an account already there will be a login button

Log in to account

A hand-drawn diagram of a login form. It consists of a large outer rectangle representing a screen. Inside this rectangle, at the top, is a smaller rectangle containing the word "Login". Below this, there are two input fields. The first is labeled "Email" and contains the text "tayttum@mail.com". The second is labeled "Password" and contains four dots. At the bottom of the form is a button labeled "Login". The entire form is enclosed in a double-line border, with a thick black bar at the top and bottom representing a mobile device's status bar and home indicator.

- User logs in to their account. Should only have to do this once.

Welcome screen

- Only shows the first time the user opens the app or when they have created an account.

Main screen

- User comes to the “home screen” of the app

Add a task

Task name

Task Description

Due date and Time

▼

Start time ▼

End time ▼

Set Reminder

Due date and Time

▼

Repeat ▼

Dropdown of the time, or maybe have the user type the time it's due

When user will start the task and when they will end it

To set reminders for the task
